## ABOUT ME

Hello, I'm Kubilay Akkiz. I am an Industrial Engineer with experience in data analytics, process design, and production tracking systems. Currently, I work as an IT Manager at Midas Hediye Eşya Sanayi ve Ticaret A.Ş., where I develop innovative projects.

I enjoy creating data-driven decision-making solutions, designing production planning and tracking systems, and supporting businesses in strengthening their online presence. As a freelancer, I also design WordPress-based websites tailored to individual and corporate needs.

I see technology as a tool to simplify and enhance business processes, and I value continuous learning to grow and improve.

## EDUCATION

2012 - 2016

Istanbul Beykent  
University

### Bachelor's Degree, Industrial Engineering

During my studies, I gained a solid foundation in optimizing processes, improving efficiency, and solving complex industrial problems. The program provided me with analytical thinking skills and a structured approach to addressing challenges in various industries.

## EXPERIENCE

2020 - 2023

Midas Hediye Eşya San.  
ve Tic. A.Ş. – Istanbul

### IT Executive

As part of various projects in a manufacturing company, I carry out IT-focused tasks such as SAP developments, MES screen designs, database integrations, and data provisioning. My responsibilities include managing inventory systems, supporting production processes, and implementing technological improvements to enhance production efficiency. Through these efforts, I contribute to improving operational workflows, optimizing efficiency, and enabling data-driven decision-making within the organization.

2018 - 2019

KOTON – Istanbul

### Store Planner

I ensured that the right products were available in the right stores at the right time and quantities based on sales potential, customer profiles, and needs. This involved managing operational activities such as initial distribution, stock replenishment, and store-to-store transfers. I also conducted regular meetings to report and plan, while collaborating with stores to observe customer expectations and feedback.

2014 - 2015

Tofaş Türk Otomobil  
Fabrikası A.Ş. – Istanbul

### Intern Engineer

I supported the production team by analyzing workflow processes and contributing to projects aimed at improving efficiency in the production line.

2013 - 2016

Özel Yeni Nesil Meslek  
Kursu – Istanbul

### IT Specialist

I managed and maintained IT systems for the institution, ensuring seamless operations for both staff and students. My role also involved troubleshooting and upgrading systems as needed.
